Well, hmmm...let's see...[Iran has more nuclear capability than most suspected](#) (though it's not confirmed by the IAEA yet...and of course, Iran isn't pursuing nuclear weapons), and then [Oil supplies from Russia will fall short of expectations over the next four years](#), just adding to the supply concerns that have driven world oil prices to record highs this week.

Yeah, I'd say that ought to be enough to get things going.
