Jerome a Paris (one day, I will figure out how to get the accents in there, but you know who I am talking about) has a really cool piece today, where he details a thought experiment regarding the circumstances if Norway were to tomorrow decide to make oil a little less fungible.

[Here's the link](#) to "The Day of the Oslo Warning."

[editor's note, by Prof. Goose] yeah, we know TOD's running a little slow off and on today...appropriate authorities have been notified and are supposedly whipping the mice on the wheels back in to shape in an appropriate and timely manner.
