[editor's note, by Prof. Goose] There's a discussion of the 60 Minutes piece on E85 Ethanol evolving in here as well. We are not amused.

If you're needing something to read, [JDH is talking about oil prices](#), then there's [this piece from the NYT](#) (registration required), it [never hurts to go read John Robb](#), or if you're really looking to learn something today, [read various portrayals of the Crusades](#).

Also, don't forget to give our sponsors in the left sidebar a look if you are so inclined, note especially our newest sponsor on the petition to tell "Congress to keep the 100 bucks campaign" from EWG. (Interesting little (and free) Kevin Bacon-style experiment there.)
