

## something to read on a Sunday for us quantoids...

Posted by Prof. Goose on June 5, 2005 - 4:59pm

Check out Mobjectivist's post from yesterday on the derivation of the distribution function of the peak oil supply curve. I will warn you now, it is equation heavy, but for us quantitatively-disposed folks, it's an important discussion, especially regarding the shape the curve post-peak.

Also, we've already had a discussion here that kind of discusses the ideas of what the shape of the post-peak world will look like without the quantitative parlance a month or so ago, so check that out as well if you wish.
