Last week there was a [hilarious post](#) that proposed a taxonomy of the camps in the peak oil debate. (Hat tip to [several commenters](#) who pointed it out over the past week.) While I don't agree with everything that was said, it's definitely an interesting exercise. Four main species are proposed: **Cornucopians**, **Traditionalists**, **Technopeakers**, and **Doomers**. [WHT](#) joins the fun with a fifth species, **Wingpawns**.

I was going to paste in descriptions of each species, but I found that quotes were too lengthy and I didn't want to cut out anything. So I encourage you to read the two posts linked above and then take the poll below the fold.

The choices below are from [WHT's interpretation](#) of the [original article](#). You may find that multiple choices describe you. Please pick the single choice that describes you best. Remember, poll answers are anonymous, so feel free to answer honestly.
