For the all of you new folks coming in, and those who want to pass around links to their friends, I would suggest two key links:

1. Why are oil prices going up? Because there's no extra supply. Why is that? Here's our ["first time here?" link](#).
2. What can we do about it? Here's our brief on [changing the political discourse on energy](#).

Update [2006-7-13 17:40:39 by Prof. Goose]: Also, whoever's been reddit-/digg-ing this post: thank you. We're getting a nice little pop from it.
