Mike Bloomberg's call for congestion pricing came on Earth Day 2007 when he presented his [full plan](#) for making NYC more sustainable by the year 2030. This is a video excerpt of his speech outlining how congestion pricing will work.

It stands up well as a good synopsis of how congestion pricing will improve NYC's sustainability. Bloomberg is on a roll lately as he unveils his environmental initiatives and explains how in reducing oil consumption and greenhouse gases we can also improve quality of life for millions of people in NYC. It shows how reducing oil consumption and greenhouse gases can be win-win instead of a sacrifice.
