Folks, thanks for your great efforts in this thread. There's a lot of cool stuff down there! Now, if we just knew where Dean was going...so, continue linking to maps (esp. of Cantarell/Jack/Yucatan, but Texas and LA too), oil maps, NG maps, LNG stations, refinery maps, pipeline maps, shipping lanes, rig maps, news stories, weather, track predictions, strategic resources, and all that other stuff in this comment thread. Then I'll go through and start aggregating those for what looks more and more like it will be a very busy week next week. Ideas or assistance are always welcome. **(New post on Dean as of 20:50 EDT 8/19 up top.)**
