2007 witnessed a rally from \$67 to \$99 - we have one more day to kiss \$100 on the price of front month crude - it may be close. Here is a [POLL](#), open until Jan 1, where you can post your prediction for oils closing price for year end 2008. As previously discussed, sometimes the shape of the chart, chronological movement, and volatility can tell more of the underlying story than a closing price. Here we are asking just for the price, 12/31/2008.

Here is the [POLL](#). Here are the choices:

- 1) Below \$50
- 2) \$50-\$65
- 3) \$65-\$80
- 4) \$80-\$95
- 5) \$95-\$110
- 6) \$110-\$130
- 7) \$130-\$180
- 8) Above \$180
- 9) I have no freakin' idea. Futures distribution centers on \$90, so thats more likely than anything

Discuss, debate, predict, and happy new year!
