Topic: [Site news](#)

[TOD:Europe](#) also broke its monthly record--over 150k visits in the month! Talk about a "wow." Congrats guys, well done.

TOD averaged ~28k unique visits a day and ~61k views a day. Google analytics estimates that around 336,000 *different visitors* (by IP) came through here in the month of June. Wow...

The whole TOD enterprise doesn't happen without all of you coming here and taking part. We thank you for your patronage, your helping spread what happens here around the web, your civilly intelligent participation, and your enforcement of the norms we have created here. People *can* inform and learn from each other, and we thank you for making it happen.

More site stats under the fold, including our top referrers, which are sites you should patronize at every opportunity.

My colleagues here are pretty amazing people, aren't they? They work their rears off. :) Thank them the next time you get a chance--they deserve it, at least in my humble opinion!

You all are one hell of a community.

Please patronize our top referring sites (in order of number of referrals over the last three months):

<http://energybulletin.net>

(And if you haven't been back yet, make sure to go check out [Energy Bulletin](#) now that they are back online after their server upgrade. We feel your pain, EB. Welcome back.)
