(welcome MSNBC viewers...while there's some interesting stuff in this post, but I think they might have linked to the wrong one from the description...[click here to go the article I think they meant to send you to](#), or [click here to go out to the front page](#). Either way, welcome!)

Here is a really neat tool from the KAC/UCF modeling folks that allows you to zoom in to see specific rigs in the path of Rita and a lot of other stuff including online mapping.

Here is another concern, the sheer amount of chemical processing and the damage in the Houston area, especially Deer Park.

Here is a listing of oil related facilities in [LA](#) and [TX](#)

Here is a picture of the models superimposed with the gas/oil rigs and Katrina's path (thanks

billyt):
