

## Ideas for Posts - What would Readers Like to Hear About?

Posted by [Gail the Actuary](#) on September 6, 2010 - 10:30am

Topic: [Miscellaneous](#)

We talk about "Energy and our Future". But what, specifically would you, the reader, like to hear about?

Some ideas:

More introductory overview posts?

More about natural gas?

More about population and overshoot issues?

More about political issues--in the US or in the EU?

More about alternatives?

More about oil possibilities in Iraq and other places with potential for increases?

More about nuclear?

Do you have any specific suggestions for authors for guest posts on subjects of interest? Or e-mail me at [GailTverberg@comcast.net](mailto:GailTverberg@comcast.net).
