

A new home for TOD:ANZ

Posted by [Super G](#) on December 10, 2010 - 10:13pm

The regional TOD sites were recently folded into the main site. (Of course, all old content is archived [here](#).) The folks running TOD:Australia/New Zealand wished to continue writing region-specific content, so they've set up shop at <http://todanz.blogspot.com>. The address <http://anz.theoil drum.com> and the RSS feed at <http://feeds.feedburner.com/theoil drum/anz> now point there. If you're interested in energy news from Australia and New Zealand, please check it out.

The TOD:ANZ crew are still on staff here, so we'll be running their general energy content as well.
