Update [2006-1-31 18:15:26 by Super G]: NY Times [reporting](#): "Bush to Say 'America Is Addicted to Oil' in Speech".

President Bush plans to tell Americans tonight that they must not retreat from challenges at home and abroad, that they make the economy of the United States the best in the world, but that they must break a national "addiction" to oil.

"In a complex and challenging time, the road of isolationism and protectionism may seem broad and invited, yet it ends in danger and decline," Mr. Bush says in his State of the Union address, according to excerpts issued in advance by the White House.
